DETAILED ACTION

Notice of Allowance

The examiner is in receipt of the Board of Appeals decision mailed 9/22/2004. Acknowledgement is made to the reversal of the examiner's position. The claims have been carefully reconsidered in light of the decision and have resulted in the following reasons for allowance.

Reasons for Allowance

Claims 1-14 and 29-44 are allowable.

The following is an Examiner's statement of reasons for allowance for independent claims 1,30,33,35,36,37,and 43.

The instant claims teach a method, apparatus, and storage medium for receiving a plurality of status indicators which includes a trading identifier that is associated with the plurality of different processes involved in the ordering and delivery of a products purchased using the e-commerce method, apparatus, and storage medium of the instant claims.

Independent claims 1,30,33,35,36,37,and 43 identify the uniquely distinct feature as follows:

Claim 1:

receiving from said communication network trading processing information including and e-mail address, a present status of processing for delivery of said

Art Unit: 3625

product corresponding to said order, a present status of processing for payment processing for said trading, a present status of processing for payment processing for said trading and the trading identifier,

Claim 30:

creating trading processing information including a present status of processing for processing initiated for said order, a present status of processing for delivery of said product corresponding to said order, a present status of processing for payment processing for said trading, and the trading identifier

Claim 33:

a trading status transmitting device for creating trading processing information including a present status of processing for processing initiated for said order, a present status of processing for delivery of said product corresponding to said order, a present status of processing for payment processing for said trading, and the trading identifier

Claim 35:

a storage component having a code sequence for realizing the step of creating trading processing information including a present status of processing for processing initiated for said order, a present status of processing for delivery of said product corresponding to said order, a present status of processing for payment processing for said trading, and the trading identifier

Art Unit: 3625

Claim 36:

a storage component having a code sequence for realizing a step of transmitting to said client trading information including a trading identifier associated with said order and data on the contents of said order,

Claim 37:

a trading information acquiring device for receiving from server trading processing information including a present status of processing for processing initiated for said order, a present status of processing for delivery of said product corresponding to said order, a present status of processing for payment processing for said trading, and the trading identifier

Claim 43:

a storage component having a code sequence for realizing the step of receiving from said server trading processing information including a present status of processing for processing initiated for said order, a present status of processing for delivery of said product corresponding to said order, a present status of processing for payment processing for said trading, and the trading identifier

US Patents and PG-PUB

(i) US Patent 5903878 Talati et al. discloses a unique transaction identifier associated with a purchase order. Talati et al, however fails to anticipate or render the application's above-mentioned limitation(s) obvious.

(ii) US Patent 5,870,717 to Wiecha discloses a method for tracking purchase orders in an e-commerce environment. Wiecha, however fails to anticipate or render the application's above-mentioned limitation(s) obvious.

Foreign Patent Documents

(iii) WO 94/28497 teaches a method for tracking purchase orders to a plurality of suppliers. This patent however, fails to anticipate or render the application's above-mentioned limitation(s) obvious.

Non-Patent Literature

(iv) Towle, Henry, On the fast track with TotalTrack: UPS deploys mobile data service, May 1993, teaches tracking packages and reporting information

Art Unit: 3625

over a network, Towle, however fails to anticipate or render the application's above-mentioned limitation(s) obvious.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Mark Fadok** whose telephone number is **(571) 272-6755**. The examiner can normally be reached Monday thru Thursday 8:00 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Wynn Coggins** can be reached on **(571) 272-7159**.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **receptionist** whose telephone number is **(571) 272-3600**.

Any response to this action should be mailed to:

Commissioner for Patents

P.O. Box 1450

Alexandria, Va. 22313-1450

or faxed to:

(571) 273-8300 [Official communications; including

After Final communications labeled
